

TAVOLE GIREVOLI

www.faremec.com

Soluzione personalizzata Customized Solution

Con più di 40 anni di esperienza nella produzione di Ralle di Rotazione , Supporti in Acciaio, Cuscinetti Speciali, **FA.RE.MEC.** è diventata un punto di riferimento nella produzione di soluzioni di movimentazione per il settore industriale, del trasporto e sollevamento, nonché nel settore delle energie rinnovabili.

FA.RE.MEC. ha i propri stabilimenti produttivi in ITALIA, dove abbiamo la possibilità di fornire soluzioni standard competitive da magazzino o personalizzate secondo specifica del cliente attraverso un processo di produzione flessibile e garantendo consegne puntuali.

Oltre alla produzione "storica" menzionata prima e grazie alla flessibilità della nostra officina produciamo e rigeneriamo **TAVOLE GIREVOLI DI ROTAZIONE** standard o in serie speciale su specifica del cliente.

L'accurata gestione delle fasi di produzione e lavorazione, l'elevata competenza del nostro reparto produttivo, la qualità dei nostri trattamenti termico/superficiali e i minuziosi controlli durante tutte le fasi del ciclo di lavoro, garantiscono precisione e affidabilità a tutti i nostri prodotti.

Prodotti che trovano applicazione industriale e artigianale nelle attrezzature di trasporto e sollevamento, nel settore agricolo, dell'industria alimentare, del packaging e nei macchinari per marmo, legno e vetro.

Applicazione del prodotto

Product Application

Autogru montata
Mounted Truck Crane

Gru marina
Marine Crane

Camion sottovuoto
Vacuum Truck

Attrezzatura
di trasmissione
Transmission Equipment

Martello idraulico demolitore
Hydraulic Breaking Hammer

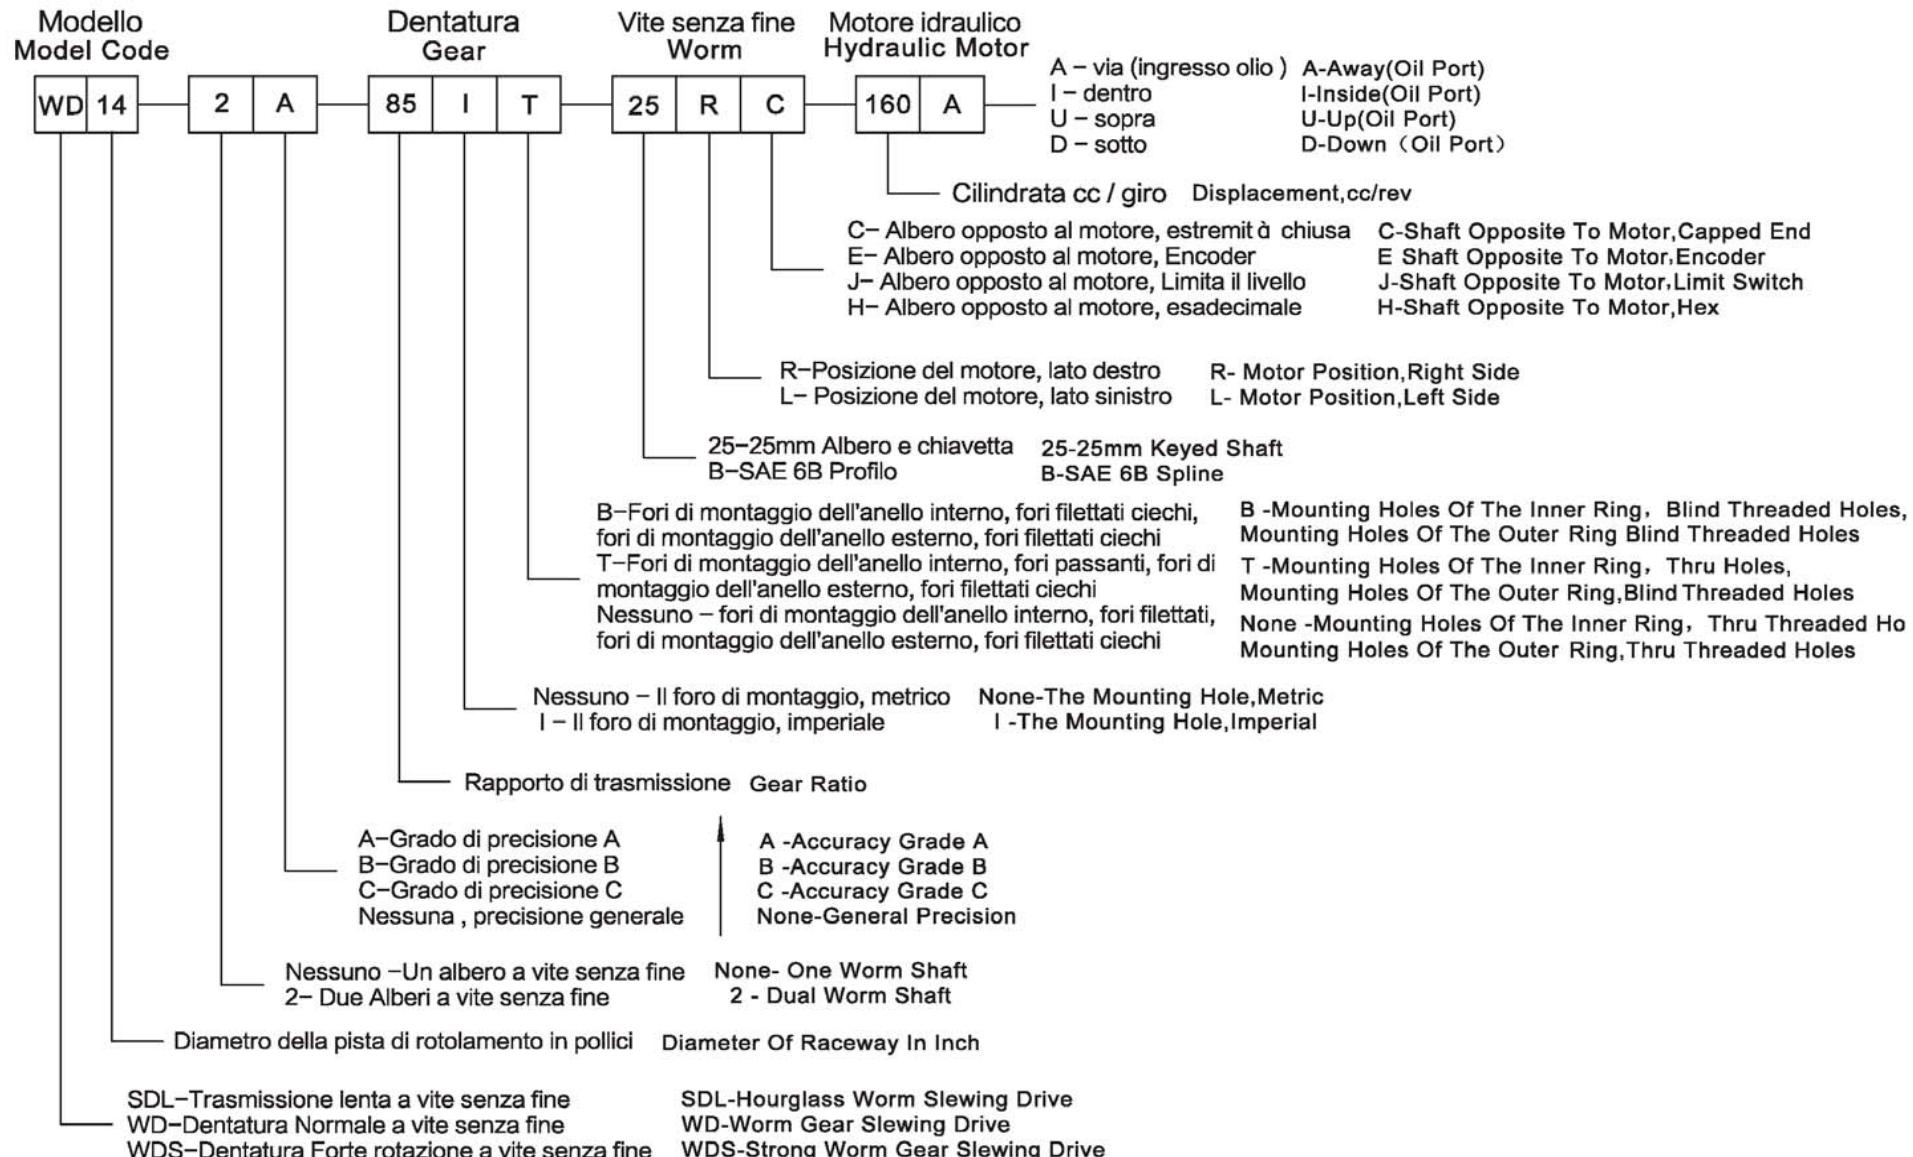

Piattaforme aeree
Aerial Working Platform

Lavorazione del legname
Timber Grab

Diagramma di durata in servizio

Working Time Diagram

Il servizio massimo consentito al minuto
The maximum permissible duty per minute

pre-condizioni per lo schema del servizio massimo ammissibile ED max

verifica della condizione:

Condizione soddisfatta È ammesso il servizio al minuto

Pre-conditions for the diagram of maximum permissible Duty per minute ED_{max}'. Verifying the condition :ED_{B'}≤ED_{max}' condition fulfilled Duty per minute .

$$f_{MD} = \frac{M_{dB}}{M_{d_{max}}}$$

$$ED_{B'} = \frac{D}{Min} * 100\%$$

D rappresenta l'operazione di rotazione dell'azionamento al minuto

Es.: Funzionamento della rotazione della trasmissione al minuto 20sec. Ruotando 40sec. Fermo D=0,3333

D represents the operation of Slew Drive per minute.

Eg: Operation of Slew Drive per minute: 20s rotating 40s standing still. D=0.3333
